

## Kart-Crazy.co.uk Charger Instructions.

1. Remove the white “thumb wheel” or wing nut.
2. Remove the spacer, if fitted.
3. Place the transponder’s bottom end under the end retainer.
4. Put the “loop” end over the bar that the thumb nut was on.
5. Put the spacer over the bar.
6. Plug the power supply into the charger holder.
7. Plug the power supply into the mains.
8. Tighten the white thumb wheel a few turns so it secures the transponder.  
DO NOT tighten much. As you tighten watch the transponder light, once it starts to flash red there is no need to tighten any more.
9. The transponder should now be charging. If it is not you may need to tighten the thumb wheel a little, but do not over tighten, or move the transponder a little.
